SUMMARY

Mobile Developer experienced in Flutter, Android, and iOS application development. Skilled in building cross-platform apps with strong UI/UX design, delivering clean, user-friendly, and high-performance mobile solutions

CORE SKILL

- **Mobile Development:** Flutter, Dart, Native Android (Java/Kotlin), React Native, iOS (Swift - basic)
- **Backend & APIs:** Laravel, Node.js, REST APIs, Firebase, MySQL, SQLite
- **Development Tools:** Android Studio, Visual Studio Code, Xcode, Git/GitHub
- **Specialized Systems:** Real-time Applications, Payment Integration (DuitNow), Biometric Authentication, GPS Tracking, NFC Card Reading
- **Design & Process:** UI/UX Design, Agile/Scrum, Cross-Platform Development, Team Leadership

WORK EXPERIENCE

Full Stack Mobile Developer , Nazsofttech Sdn. Bhd (Parent Company) **Mar 2023 - Present**

- Develop mobile applications with custom UI/UX design, handling end-to-end user experience and interface implementation
- Build and maintain APIs using Laravel framework for backend services
- Design and implement complete mobile solutions from concept to deployment, including both client-side and server-side development

Mobile App Developer, FXI Group (Subsidiary) **Mar 2023 - Present**

- Developed comprehensive media platform mobile application using Flutter framework
- Built multi-feature app supporting video, image, and livestream content with integrated ecommerce functionality
- Implemented real-time livestreaming capabilities using Agora SDK for seamless user broadcasting experience
- Created in-app commerce features allowing users to purchase products directly within post content and live streams
- Developed media upload functionality enabling users to share various content types (video, images, etc.)
- Delivered end-to-end mobile solution combining social media, livestreaming, and ecommerce in a single platform

Mobile App Developer, Pasca Jaya Sdn. Bhd (Subsidiary)**Mar 2023 - Present**

- Developed mobile applications for Malaysian government agencies, specializing in public service digital solutions
- Built applications for federal agencies including Department of Environment (Jabatan Alam Sekitar) and Department of Agriculture (Jabatan Pertanian)
- Created mobile solutions for Perak state government including Zakat Perak payment and management system
- Developed eMufti Kiblat app providing Islamic guidance and Qibla direction services for Muslim community
- Delivered government-grade mobile applications meeting public sector requirements and compliance standards
- Collaborated with government stakeholders to digitize public services and improve citizen accessibility

Mobile App Developer, Digital Food Industries Sdn. Bhd (Subsidiary)**Mar 2023 - Present**

- Developed comprehensive Point of Sale (POS) system specifically designed for food & beverage industry operations
- Built multi-device synchronization functionality enabling real-time data sync across multiple POS terminals
- Implemented thermal receipt printing integration for seamless transaction processing
- Designed clean, intuitive user interface optimized for fast-paced restaurant environments
- Integrated dynamic DuitNow QR code generation for contactless payment processing
- Created interactive secondary customer-facing display for order confirmation and engagement
- Delivered complete F&B management solution streamlining operations from order taking to payment processing

Mobile App Developer, Settlepay Sdn Bhd (Subsidiary)**Mar 2023 - Present**

- Developed comprehensive school fee (yuran) management mobile application for parents and educational institutions
- Built multi-child account management system allowing parents to oversee multiple children's school payments within a single app
- Created cross-school payment integration enabling parents to manage fees across different schools using the system
- Implemented secure payment processing for various school fee types and schedules
- Designed parent-friendly interface for tracking payment history, due dates, and outstanding balances across all enrolled children
- Delivered centralized education payment solution streamlining school fee management for families with multiple students

Mobile App Developer, Kijang Handal Sdn. Bhd (Subsidiary)**Mar 2023 - Present**

- Developed official mobile application for Kelantan Darul Naim Football Club serving thousands of fans and supporters
- Built comprehensive sports app featuring live score updates, upcoming fixtures, and match scheduling
- Integrated news feed and highlight sections for club updates, match reports, and video content
- Implemented real-time sports data integration for accurate match information and statistics
- Created innovative parking payment system allowing users to pay for parking fees directly through the app in Kelantan
- Delivered all-in-one fan experience combining sports content with practical location-based services

Mobile App Developer, Awfatech Sdn. Bhd (Parent Company)**Feb 2020 - Jan 2023**

- Developed biometric attendance system using native Java Android for educational institutions and corporate HR management
- Implemented facial recognition and fingerprint authentication technologies for secure employee/student check-in systems
- Built Android applications for specialized biometric hardware devices ensuring accurate attendance tracking
- Created integrated school and HR management solutions streamlining attendance monitoring and reporting

Mobile App Developer, Hudhud Technologies Sdn. Bhd**Feb 2020 - Jan 2023**

- Developed comprehensive e-commerce marketplace ecosystem with multiple specialized applications
 - Built seller-focused mobile application enabling vendors to manage inventory, orders, and business operations
 - Created rider/delivery app with real-time GPS tracking and route optimization for logistics management
 - Implemented location synchronization between rider app and customer marketplace app for live delivery tracking
 - Delivered complete marketplace solution covering customer shopping, vendor management, and delivery logistics
-

EDUCATION

Bachelor Degree (Hons) Electronic Engineering

Sep 2017 - Jan 2020

Universiti Teknologi MARA Shah Alam

- Major Computer & Communication System.
- Thesis on "Genetic Algorithm".

Diploma Electric and Electronic Engineering

Aug 2014 - Dec 2016

Universiti Teknologi MARA Pasir Gudang

- Major Computer & Communication System.
- Final year project on "Smart Health Monitoring System"

ADDITIONAL INFORMATION

- **Technical Skills:** Flutter, Dart, Laravel, MySQL, NodeJs, React Native, Android Development (Java/Kotlin), iOS Development (Swift), REST APIs, Firebase, Cloud Integration, Git, Agile/Scrum
- **UI/UX Skills:** Wireframing, Prototyping, Responsive Design, User-Centered Design, Clean Interface Development
- **Languages:** English, Malay
- **Professional Experience Highlights:** Leading mobile development teams, mentoring junior developers, managing cross-platform projects, delivering scalable and high-performance applications
- **Activities:** Actively contribute to app architecture design, code reviews, and implementation of best practices to improve development workflow
